Warnings

Variables IUSSOLI_BIR, ORDNAT_RENREQ, ORDNAT_LANREQ, ORDNAT_ASSIREQ, ORDNAT_ECOREQ, SPECNAT_REACQ, SPECNAT_CULAFF, LOSS_RESABR, LOSS_FORCIT were specified or implied to be grouped into a number of categories (NCAT) equal to or greater than the number of distinct values of the variables (NCAT is set to this number). For integer variables this implies that grouping has no effect, and for real and string variables that grouping results in ranking.

14	6.169303	.000228	17.830697	16.345860	1.484837
15	6.169497	.000194	17.830503	16.345992	1.484511
16	6.169559	.000062	17.830441	16.346101	1.484340
17	6.169576	.000017	17.830424	16.345715	1.484710
18 ^b	6.169585	.000010	17.830415	16.345504	1.484911

a. Iteration 0 displays the statistics of the solution with all variables, except variables with optimal scaling level Multiple Nominal, treated as numerical.

b. The iteration process stopped because the convergence test value was reached.

Model Summary

Dimension	Cronbach's Alpha	Variance Accounted For	
		Total (Eigenvalue)	% of Variance
1	.798	3.730	31.085
2	.644	2.439	20.328
Total	.914 ^a	6.170	51.413

a. Total Cronbach's Alpha is based on the total Eigenvalue.

Quantifications

Table

IUSSANG_BIR^a

Category	Frequency	Quantification	Centroid Coordinates		Vector Coordinates	
			Dimension		Dimension	
			1	2	1	2
1.38 - 1.63	2	-3.034	.012	-1.711	-.208	-2.031

Warnings

Variables IUSSOLI_BIR, ORDNAT_RENREQ, ORDNAT_LANREQ, ORDNAT_ASSIREQ, ORDNAT_ECOREQ, SPECNAT_REACQ, SPECNAT_CULAFF, LOSS_RESABR, LOSS_FORCIT were specified or implied to be grouped into a number of categories (NCAT) equal to or greater than the number of distinct values of the variables (NCAT is set to this number). For integer variables this implies that grouping has no effect, and for real and string variables that grouping results in ranking.

Case Processing Summary

Valid Active Cases	36
Active Cases with Missing Values	0
Supplementary Cases	0
Total	36
Cases Used in Analysis	36

Iteration History

Iteration Number	Variance Accounted For		Loss		
	Total	Increase	Total	Centroid Coordinates	Restriction of Centroid to Vector Coordinates
0 ^a	3.350085	.000007	8.649915	7.812678	.837237
25 ^b	3.992161	.000009	8.007839	7.627044	.380795

a. Iteration 0 displays the statistics of the solution with all variables, except variables with optimal scaling level Multiple Nominal, treated as numerical.

b. The iteration process stopped because the convergence test value was reached.

Model Summary

Dimension	Cronbach's Alpha	Variance Accounted For	
		Total (Eigenvalue)	% of Variance
1	.818	3.992	33.268

Warnings

Variables IUSSOLI_BIR, ORDNAT_RENREQ, ORDNAT_LANREQ, ORDNAT_ASSIREQ, ORDNAT_ECOREQ, SPECNAT_REACQ, SPECNAT_CULAFF, LOSS_RESABR, LOSS_FORCIT were specified or implied to be grouped into a number of categories (NCAT) equal to or greater than the number of distinct values of the variables (NCAT is set to this number). For integer variables this implies that grouping has no effect, and for real and string variables that grouping results in ranking.

To obtain scatterplots of pairs of dimensions in stead of a matrix scatterplot you can use the NDIM keyword with the PLOT subcommand: NDIM(d1,d2) produces scatterplots of dimension d1 plotted against all higher dimensions up to d2.

Case Processing Summary

Valid Active Cases	36
Active Cases with Missing Values	0
Supplementary Cases	0
Total	36
Cases Used in Analysis	36

Iteration History

Iteration Number	Variance Accounted For		Loss		
	Total	Increase	Total	Centroid Coordinates	Restriction of Centroid to Vector Coordinates
0^a	6.788625	.005783	29.211375	26.179039	3.032337
46^b	7.617906	.000010	28.382094	25.839237	2.542858

- a. Iteration 0 displays the statistics of the solution with all variables, except variables with optimal scaling level Multiple Nominal, treated as numerical.
- b. The iteration process stopped because the convergence test value was reached.

Model Summary

Dimension	Cronbach's Alpha	Variance Accounted For	
		Total (Eigenvalue)	% of Variance
1	.797	3.711	30.924
2	.635	2.395	19.958
3	.369	1.512	12.601
Total	.948 ^a	7.618	63.483

a. Total Cronbach's Alpha is based on the total Eigenvalue.
